

Business Integration

In the post dot-com era, we see two particularly strong trends:

- 1 | *Increasing collaboration among all business entities for enhanced process efficiencies.*
- 2 | *Consolidation in various industries through Mergers & Acquisitions.*

Today's networked economy demands information dissemination both inside and outside your organization. The increasingly collaborative and global nature of business today requires extensive integration within the enterprise but also real-time connections to suppliers, partners and customers. At the same time, Mergers and Acquisitions have further fueled the need to be quick and reliable. The success of mergers has come to depend, to a great extent, on the speed of integrating their respective diverse IT systems.

Goldstone specializes in providing end-to-end integration solutions for all the specific needs of clients. Goldstone brings proven experience in developing application adaptors and implementing solutions based on a variety of middle-ware products and integration brokers.

Why Goldstone?

Goldstone has embraced mature development models and implementation processes that are among the best in the industry. We follow standards that enjoy widespread industry acceptance. We make use of web services and web protocols to provide a low-risk communication mechanism and ease of interoperability to integrate businesses, departments or applications quickly and effectively.

With state-of-the-art development centers situated strategically in the US and India, we offer a broad spectrum of enterprise-wide integration solutions over heterogeneous environments. With state-of-

the-art software and hardware, as well as project management, design and programming experience at all our international locations, we offer flexible service models suiting your budget and requirements on a full/partial responsibility basis.

Integration Solutions

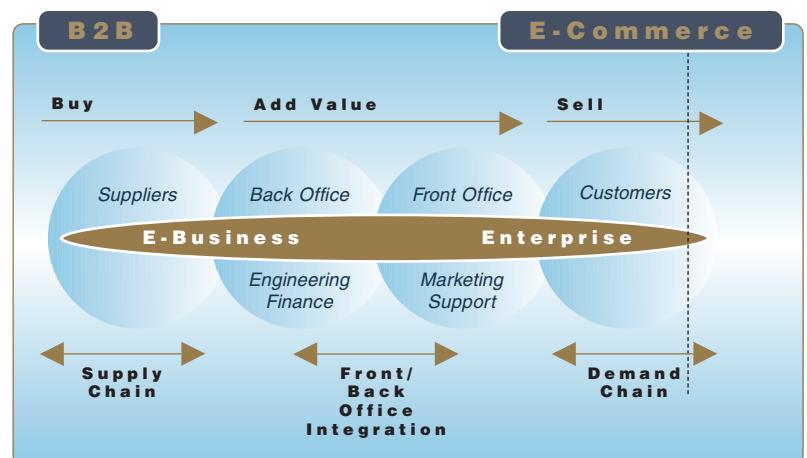

Goldstone builds integration solutions for businesses based on a non-intrusive approach. This allows you to unify and reuse existing IT assets while enjoying a smooth transition to a cohesive corporate system framework.

Our proven solutions include:

- **Enterprise Application Integration (EAI)**
- **Business-to-Business (B2B)**
- **Wireless Integration**

We serve a variety of industry segments—including:

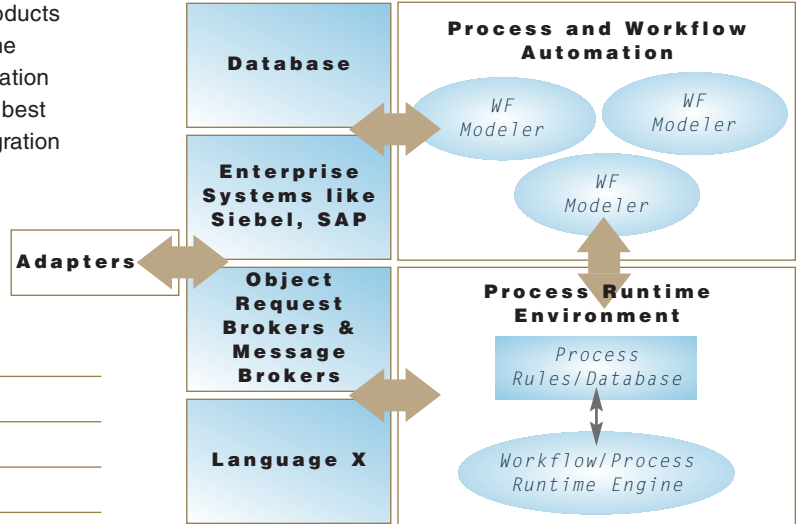

- **Telecom**
- **Banking**
- **Manufacturing**
- **Insurance**
- **Healthcare**

Goldstone offers integration solutions based on products from industry leaders. Also, given our position as the development partner for many of the leading Integration products companies, Goldstone has access to the best technical and industry knowledge for different integration scenarios.

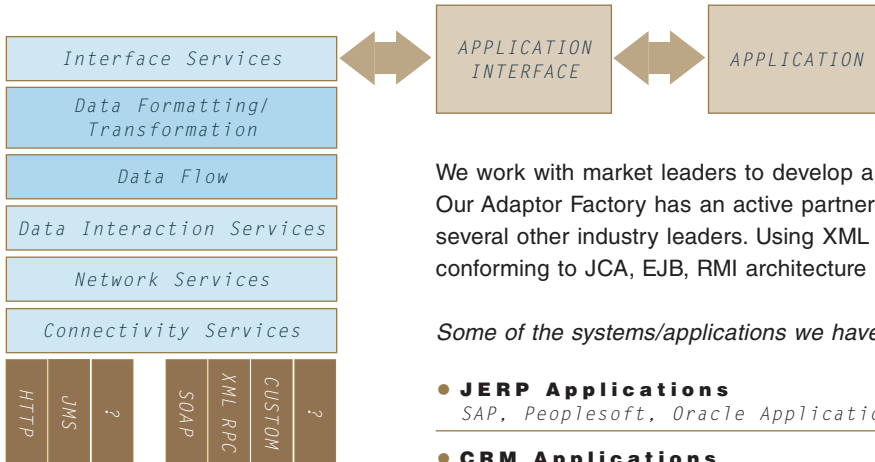

The following are some of the industry-leading integration solutions that Goldstone specializes in:

- **J2EE Application Servers**
- **Viewlocity's AMTriX and TSIB**
- **Forte Fusion**
- **TIBCO Rendezvous**
- **Vitria**
- **IBM MQ-Series**
- **NEON Systems**

Application Adaptors

Goldstone builds intelligent, standards-based and scalable adaptor/connectors to enable bi-directional and seamless access to existing enterprise systems. Our forte is the design and development of adaptors that offer a “no-coding” approach to integration. AT the core of this is our simple, automated mapping of third party technologies and data formats.

We work with market leaders to develop application adaptors for various applications. Our Adaptor Factory has an active partnership with Sun Microsystems, Viewlocity and several other industry leaders. Using XML extensively, we offer application adaptors conforming to JCA, EJB, RMI architecture or even vendor-specific middleware.

Some of the systems/applications we have built include:

- **JERP Applications**
SAP, Peoplesoft, Oracle Applications
- **CRM Applications**
Siebel, Clarify, Vantive
- **Messaging Servers**
Netscape, MQ-Series, MS-MQ
- **Directory Servers**
iPlanet LDAP
- **Billing Applications**
Portal, Solect, Billplex
- **Mail Servers**
MS-Exchange, Lotus Notes
