

**eSWAP**

**The intelligent way to stay ahead in business**

Businesses have undergone tremendous transformation across the world. With the IT revolution sweeping every sphere of activity, the changes are even more bewildering and far-reaching.

Businesses are getting networked. Transactions are happening on the spot. Geographical and time differences are rapidly vanishing. In the level playing ground of tomorrow's commerce, speed and power hold the key to success. To cope with these bewildering changes organizations are increasingly realizing the strategic advantage of implementing information technology to automate their businesses.

We present you the ultimate solution in business automation, **eSWAP**.

Based on the unique concept of **Integrated Functionality System (IFS)**, **eSWAP** is designed not only to automate your business functions but also to integrate the enterprise. It automates different business functions around the core functions of Sales, Warehousing, Accounts and Purchase. The Integrated Functionality System is based on the strong belief that an integrated enterprise is an intelligent enterprise.

**eSWAP** is a high-end, Java based, fully integrated, yet affordable solution. It has been designed around today's emerging object-oriented technology and web based environments, **eSWAP** provides the tools and functionality to streamline processes. It uses proven technology with legacy applications and structure of e-commerce in today's world. **eSWAP** provides an ultimate source of data warehousing through an easy- to- use set of powerful integration tools.

## Get 'eSWAP'. Enable your enterprise.

Some of the powerful features of 'eSWAP' are:

- Based on a robust and reliable database server
